

Any-Port Access™ Solutions

WHO IS NAUTICAL WIRELESS?

Nautical Wireless™ is the pioneer of Any-Port Access™ to the Internet, offering cost effective services, infrastructure, and products. We are everything you need to stay connected. Nautical Wireless owns, installs, and supports “hot spot” Wi-Fi® networks, using 802.11x Wireless Local Area Network (WLAN) technology in conjunction with security verification, tracking/billing systems, and value added services.

Nautical Wireless is your complete outsource solution, eliminating your worries about technical support or updates to technology.

WHAT IS NAUTICAL WIRELESS ANY-PORT ACCESS?

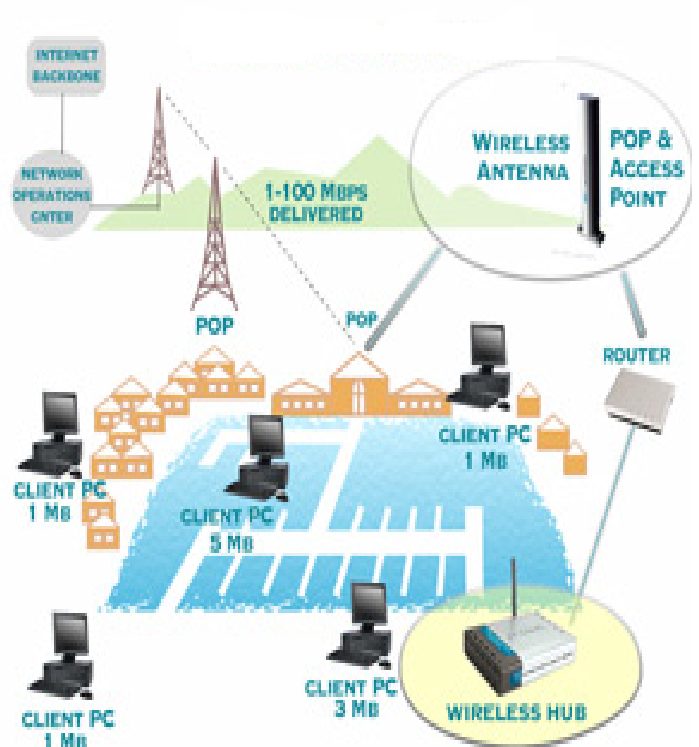

High-speed wireless Internet access is in its highest demand by the people who need to stay connected. The nautical environment and transient nature of boaters renders the traditional “hot spot” WLAN providers unable to provide you with the necessary solution. Nautical Wireless’ specialized Any-Port Access is the most easily deployed and supported solution to these problems. You can trust Nautical Wireless to maintain a constant watch over your nautical community’s Internet access, so that you can stay focused on your business. We are constantly updating our technologies and maintaining our “best of breed” solutions, leveraged by numerous years of industry success.
