

FOR IMMEDIATE RELEASE

NAUTICAL WIRELESS™ RECEIVES HIGHLY SOUGHT-AFTER CERTIFICATION FROM WI-FI ALLIANCE™ WI-FI ZONE™ DEPLOYMENT AND SERVICE STANDARDS

Boston, MA, November 6, 2003 – *Nautical Wireless*™ (www.nauticalwireless.com) today announced that the Wi-Fi Alliance™ has certified *Nautical Wireless* as a Wi-Fi Zone™ program member. “*It is definitely an honor to be certified by this quality organization as Nautical Wireless maintains a solid commitment to support leading industry standards, while delivering ultra responsive and exceptional customer service for its Any-Port Access™ solution,*” said Stephan Reckie, founder of *Nautical Wireless*.

The goal of the Wi-Fi Zone program is to help travelers find and stay connected when they travel – whether they are down the street at the local café or on vacation at a resort marina on the other side of the world. The Wi-Fi ZONE program has two primary elements – an online database of Wi-Fi ZONE™ locations (www.wi-fizone.org) and a common visual indicator – the Wi-Fi ZONE logo, which is displayed at locations and Web sites. Only service providers that meet the Wi-Fi ZONE deployment and service standards are allowed to be a Wi-Fi ZONE.

ABOUT NAUTICAL WIRELESS

Nautical Wireless is the pioneer of *Any-Port Access* to the Internet, offering cost effective services, infrastructure, and products. We are everything you need to stay connected. *Nautical Wireless* owns, installs, and supports “hot spot” Wi-Fi® networks, using 802.11x Wireless Local Area Network (WLAN) technology in conjunction with security verification, tracking/billing systems, and value added services.

Nautical Wireless is an approved participant of the Wi-Fi Zone Program (www.wi-fizone.org).

Nautical Wireless is led by Mr. Stephan Reckie, the company's founder and President, a successful and experienced entrepreneur with over 18 years of international sales channel management, OEM and strategic sales / support, and engineering experience. Mr. Reckie started *Nautical Wireless* in 2003, and previously was the Director of European / Middle East / and Africa (EMEA) Operations of Texas Instruments' Telogy Networks, the world's leading provider of Voice Over IP software and hardware solutions. Prior to Telogy Networks, Mr. Reckie held several top sales, engineering, and engineering management positions in leading edge technology development organizations in the embedded and client/server software market.

ABOUT THE WI-FI ALLIANCE

The Wi-Fi Alliance (formerly WECA) is a nonprofit organization formed in 1999 to certify interoperability of IEEE 802.11 products and to promote them as the global, wireless LAN standard across all market segments. The Wi-Fi Alliance has instituted a test suite that defines how member products are tested to certify that they are interoperable with other Wi-Fi CERTIFIED products. These tests are conducted at an independent laboratory.

The Wi-Fi Alliance now comprises over 200 members from the world's leading companies. These companies offer over 900 Wi-Fi CERTIFIED products. For more information, please visit www.wi-fi.org and for information on Wi-Fi ZONE public access locations go to www.wi-fizone.org.
